

Ranchi Women's College (Autonomous)
Circular Road, Ranchi, Jharkhand

The Research Policy for the college

- Ranchi Women's college is affiliated to the Ranchi University and adheres regulation formulated by the University of Ranchi (Memo No B/230/09 of dated 24.03.2009).

Research Policy of the College-

- The Motto of Ranchi Women's College is "Tamso Ma Jyotirgamaya" meaning- "Lead me from darkness to light" and our college strongly believes in it. Therefore, following the spirit of our motto. The institution has persistently strived to achieve academic excellence in teaching and research by encouraging and motivating the teachers as well as students. The college emphasizes on creating a research based mindset and ecosystem through which innovative ideas should be executed and reach to the society i.e. from papers to practice as per UGC guide lines.

Ranchi Women' College Encourage Research By-

1. Ranchi Women's College has taken challenge to foster a vibrant and productive research culture in the Institute, including subscribing a number of reputed e-journals and journals in the library, organizing research conferences, and encouraging and sponsoring faculty members to join scientific and professional societies.
2. Since its foundation, the college has prioritized research-oriented state-of-the art laboratory facilities for each individual department.
3. Science labs help the Research Scholars as well as PG students to increase their knowledge so that they are able to provide their best services to the Nation. The goal of biology lab is to expose students to various techniques in Botany, Chemistry, Bio-Technology and Zoology as well as to prepare them for independence in research setting.
4. The laboratory for Biotechnology has been built with state-of-the-art facilities in such a way that it promotes inclination towards research. The instruments in the laboratory also have extensive scope for carrying out projects and research activities. There is a well-equipped tissue culture lab for projects as well as research purpose. There is facilities for work related with molecular biology lab, like cooling centrifuge, Gel doc PCR Machine etc.
5. Botany laboratory has a LED Binocular Microscope that can be attached to a Laptop and a Camera is also fixed to take photographs for cytogenetics research. There is a spectrophotometer in the Botany, Zoology and Biotechnology laboratories.
6. The Zoology laboratory has a BOD incubator to facilitate research related with environment and nitrogen in wastewater samples. They provide the required temperature for the growth of microorganisms and allows to perform BOD Testing.
7. The department of geography has incorporated latest components in its syllabus both at the UG and PG level, like remote sensing, GIS & GPS.
8. The BOS of every department encourages research culture among students by incorporating project/dissertation in the P.G syllabi of every subject.
9. Members of research committee motivate and encourage both teachers and students for publication in quality journals indexed by Scopus/Web of science, UGC Care recognized Journals, Explore with separate editions for science & Humanities.
